DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, 4-8, and 30-51, drawn to crawling data given certain criteria in a network.
 - II. Claims 9-29, drawn to gathering controlling data used in by a crawling system to regulate what data is gathered by that crawling system.
 - III. Claims 52-57, drawn to controlling a remote content crawler located remotely in a network.
2. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination III has separate utility such as controlling a different kind of remote content crawler. See MPEP § 806.05(d).

The inventions are distinct, each from the other because of the following reasons:

3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the
